

## **UNIT 7: FIREGROUND DECISION MAKING EXERCISES**

Slide 7-1

### **OBJECTIVES**

The students will:

- State the objectives when confronted with a Type I, II, III, IV, or V occupancy when conducting an analytical sizeup of the structure.
- State the Strategies when confronted with a Type I, II, III, IV, or V occupancy when conducting an analytical sizeup of the structure.
- State the Tactics when confronted with a Type I, II, III, IV, or V occupancy when conducting an analytical sizeup of the structure.
- Identify and write the findings from the walk-around in Columns 1, 2, and 3 of the Primary Factors Chart.

Slide 7-2

### **OBJECTIVES (cont'd)**

- As a group, prepare a briefing of the findings from the Initial Company Officer (ICO), the Initial Company Officer Assistant (ICOA), the Initial Incident Safety Officer (IISO), Initial Planning Section, and Initial Logistics Section.
- Given a simulated incident where building construction is a critical issue, develop a sizeup report of fireground conditions, complete the Primary Factors Chart, and document progress using the Command Sequence Tactical Chart.
